# Discover

**Pirate Party Australia** is a new political movement founded on the basic tenets of:

**freedom of culture, knowledge and information**

**privacy and anonymity**

**civil and digital liberties**

**transparency of governments and organisations**

**participatory and deliberative democracy**

# The Fight

**The politicians in Canberra simply do not understand technology or the Internet. The world has moved forward without them and there's no point in waiting any longer.**

The next federal election is on **7th September** and it is our chance to show the major parties that all Australians still demand a free and democratic society with rights and liberties for all, with an open and transparent government and a democracy which is inclusive and participatory.

**We need your support** to run our candidates and campaign at this election!
